Sub: Performance of Online Sand Controller RTC installed on our 3000 kg Sand Mixer.

Dear Sirs,

We are pleased to confirm to you that the RTC106 produced by Rhino with the designs and technology from Fondarc, France, has been installed at our facility in DCM Engineering Products since 2013-2014.

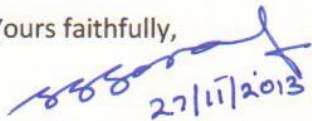

We have been able to control our Compactibility at the Moulding Centre using RTC within the desired limits on a consistent basis and are able to control our mould and casting rejections with this online sand testing tool.

The service support provided by the team of Rhino from India has been given as and when required with their Indian engineers/technicians, including support in setting up the process parameters for our green sand preparation facility.

We recommend users of Green Sand Plants to incorporate RTC for their online sand control and get the same benefits as derived by us.

Thank you,

Yours faithfully,

For DCM ENGINEERING PRODUCTS
